Notes regarding virtual world:

- A virtual tour where you can meet other students
- Live translation via ai
- Different rooms represent different cultures
- Teleportation to different rooms
- Give the possibility to create own rooms and add cultural objects there
- Basically VR chat but without the degenerates

Full key sentence summarised by Chat GPT:

A VR world where you jump between rooms that show different cultures, with AI translating people live. You can also build your own rooms, add cultural items, and chat—basically VRChat, but without the degenerates.
